

Maxalt® Step Therapy Effective 02/15/2010

Rizatriptan (Maxalt®) will be available as step therapy for the treatment of migraines after a trial and failure of sumatriptan (Imitrex®). There must be at least one fill of sumatriptan in the previous 90 days for the rizatriptan to process without a prior authorization. Quantity limit is nine (9) per month.

Members with a current prescription claim for rizatriptan (filled in the previous 90 days) will be “grandfathered” by having a one year authorization automatically applied.

If you need further information or have any questions, please contact: PHP Pharmacy Services (800) 747-7997 or (602) 824-3700; options 3,4,1
